Edition 2.0 · October 2023.

This publication was produced with the financial support of the European Union. Its contents are the sole responsibility of UGEFA and do not necessarily reflect the views of the European Union.

The **Uganda Green Enterprise Finance Accelerator** is funded by the European Union. The project is led by **adelphi research gGmbH**, a public policy consultancy and think-and-do tank focused on climate, environment and development. At adelphi, we work together with financial institutions, green enterprises and policy makers to unlock finance at scale to secure a climate-neutral and resilient tomorrow.

www.adelphi.de/en

About UGEFA

The Uganda Green Enterprise Finance Accelerator aims to facilitate the flow of green finance into the Ugandan SMEs sector through an innovative and comprehensive approach, which:

- **Targets demand- and supply side of finance:** Tackles barriers of SME finance on the finance demand and supply side
- **Blends non-financial and financial support:** Combines capacity building and innovative financial mechanisms, targeting both SMEs and financial institutions
- **Aligns support to enterprise growth journeys:** Provides support along the whole financing journey of green SMEs – from finance readiness support, funding facilitation to post-investment support

We support green enterprises working in the Clean Energy, Green Manufacturing, Sustainable Tourism, Sustainable Transport and Waste Management sectors in all regions across Uganda.

Approach to SME support

WE SUPPORT GREEN ENTERPRISES

to develop the business and financial plans needed to access financing and scale their environmental and social impacts.

Catalyser Programme

Engage with enterprises in hands-on interactive workshops focusing on key topics for financial readiness and growth

Loan Facilitation

Facilitate access to loans, tailored to the needs of green SMEs

Accelerator Programme

Support enterprises with loan management to invest in growth, scaling their contributions to job creation and a green economy

WE REDUCE RISKS OF FINANCING CHANGE

by working together with commercial banks to provide tailored financial products for green SMEs.

Collaboration with Banks

Support banks to expand their customer base to green & growing SMEs, including to effectively identify and provide capital to green SMEs looking to scale

Green Finance Academy

Provide trainings for financial institutions to build a case for green SME financing & leverage opportunities for climate finance

Waste Management

RWENZORI AGRICULTURAL QUALITY CONTROL CO. LTD

The company produces livestock feed and organic fertiliser from waste. The business collects biowaste in Kasese town and neighboring areas and feeds it to black soldier flies, producing black soldier fly larvae. The larvae are used as a protein alternative to fish meal in livestock feed, and as a fast-acting organic fertiliser.

The enterprise also raises community awareness about waste segregation and encourages farmers to use organic fertiliser.
